

STATIC CONTROL

Activities such as Lyophilisation, Spray Drying, Milling and Micronisation can create static problems with powders making them difficult to weigh accurately in small quantities. Ionizing bars can be used to neutralize the area close to them in order to help reduce the effects of static.

- Roof mount option
- Free standing point emitter
- Custom sizes available
- Compact and light weight

SPECIFICATION

- Universal 24V DC operation
- Long life tungsten ion emitters
- LED Light Status
- IP66 Fully Sealed
