

# CLEANING CONSUMABLES KIT

FOR CONTAMINATION CONTROL

The Cleaning Kit is designed to allow easy access, storage and transportation of basic and necessary cleaning products used in the Laboratory.

The Cleaning Kit includes waste bags, dry wipes, wet wipes and disposable over sleeves, all contained within a portable box with a removable lid, which includes a handle for easy carry. The kit contains products which can also be purchased individually, making restocking easy.

The Cleaning Kit is designed for easy access to necessities used daily in the Laboratory and has been designed to fit on the printer shelf, under bench shelving or as a simple and tidy pack on hand within the laboratory.

- Compact design
- Easy store
