

HiPo-VAC™

MINI VACUUM SYSTEM FOR HIGH POTENCY POWDERS

ACC-HIPO-VAC

PATENT APPLIED GB 1903370.3 TRADEMARK NO UK-00003487369

SAFE REMOVAL OF POWDER SPILLAGES

The HiPo-Vac™ is specifically designed to remove small amounts of potent powder spillages quickly and easily from difficult to reach areas inside enclosures and around balances.

The vacuum transports the powder via a waste bottle where the majority of the powder can be trapped in a water reservoir to minimise loading on the vacuum filter and for easy and safe disposal.

The extracted air is passed through a Safe Change HEPA Filter capsule to remove any excess airborne contamination.

Clean exhaust air is directed to the rear of the enclosure and again filtered with the main enclosure filters.

- Compact design
- Simple to use
- Safe change waste and filter

SPECIFICATIONS

- Dimensions (WxDxH mm) 95 x 185 x 200
- Power 90-230v 1ph
